

Prevent rejects. Boost conversion.

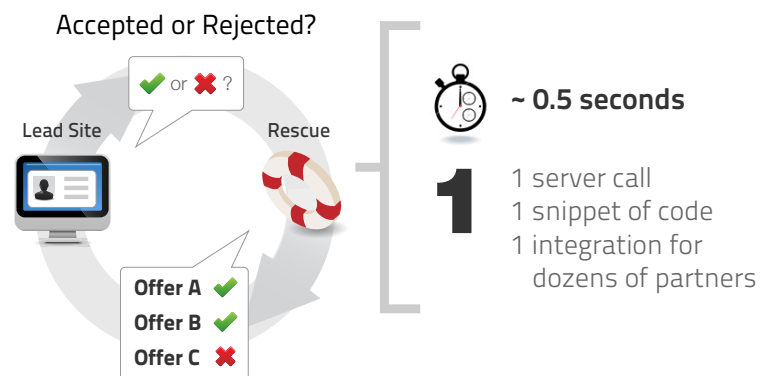

LeadTune Rescue: Prevent rejects by asking LeadTune (before you present offers to the user) which buyers will reject a lead.

- › Prevent rejects
- › Lower cost of generating billable leads
- › \$0 out-of-pocket costs to setup
- › Easy API integration with your existing systems (a few hours)
- › Free technical support

How Rescue works

When a prospect visits a seller site, sellers query Rescue with the prospect's email address and a list of potential offers. Rescue responds with a prediction of which buyers will accept a lead from that prospect.

**\$3,000
BONUS!**

(Limited time)

LeadTune Rescue is a real-time web service that tells lead sellers whether the available buyers will accept leads for a given prospect . Lead generators can then present a list of offers to the prospect that does not include buyers that would have rejected the lead.

Complete your integration with LeadTune within 30 days and receive a \$3,000 credit! Terms and Conditions may vary.
